LISTING OF CLAIMS:

Claims 1-7 (Canceled).

Claim 8 (Currently Amended): Three stage, speed-reducing planetary transmission having, in each stage, a driven sun wheel rolling in an internal gear and interacting with a planet wheel mounted on a planet carrier, in which the sun wheels of the second and third stages are each driven by the planet carrier of the preceding stage, and

C12
a fixed transmission housing, in which at least the internal gear of the third stage is rigidly connected with the transmission housing and the internal gears of the first and second stages are each rigidly connected with the planet carrier of the third stage, and

in which, furthermore, the planet carriers of the second and third stages are each provided with four planet wheels ~~across~~ their width in a circumferential direction, and wherein

- the internal gears (6, 12, 13) each have a number of

teeth $z = 108$ in all three stages,

- the transmission ratios are $1 = 4$ for the second stage and $i = 5.5$ for the third stage.

Claim 9 (Currently Amended): Three stage, speed-reducing planetary transmission having, in each stage, a driven sun wheel rolling in an internal gear and interacting with a planet wheel mounted on a planet carrier, in which the sun wheels of the second and third stages are each driven by the planet carrier of the preceding stage, and

C12
a fixed transmission housing, in which at least the internal gear of the third stage is rigidly connected with the transmission housing and the internal gears of the first and second stages are each rigidly connected with the transmission housing, and

in which, furthermore, the planet carriers of the second and third stages are each provided with four planet wheels ~~across their width~~ in a circumferential direction, and wherein

- the internal gears (6, 12, 13) each have a number of teeth $z = 108$ in all three stages,

- C12
- the transmission ratios are $i = 4$ for the second stage
and $i = 5.5$ for the third stage.
-
